# Save time and money

## WHY DO YOU NEED ASSET TRACKING?

For a number of years, the majority of companies and organisations have tended not to keep a current asset register. In those instances where there was a register, it tended to be a paper document. It soon became obsolete because to keep the information about assets up to date was time consuming, expensive and impossible to use for reporting purposes anyway.

## asset tracking - the easy way

Over the last few years, however, finance and facilities departments have come under increasing pressure from their accountants, auditors, tax & VAT inspectors, Insurance companies and just about anyone else you care to mention, to build and maintain an up to date asset register.

## WHAT YOU CAN DO ABOUT IT?

The task of capturing your company's asset information, and keeping it up to date has never been easier.

There are two ways of dealing with it. You could buy the Asset-FM database and carry out the task in-house, or you could save a lot of hassle and initially get us to build the asset register for you.

Our trained staff will capture all of the data you specify with the minimum amount of disruption. We can also carry out subsequent audits for you if you wish.

## WHY USE US?

- years of experience
- reliable and convenient service
- city and guilds qualified engineers
- £10 Million public liability insurance
- ISO9001 registered
- British Safety Council members
- Safe Contractor approved
- Government Trust Mark endorsed
- concom registered

MANAGEMENT SOFTWARE

AND MORE

The DataTrak Head Office is located in Milton Keynes. Our engineers, however, are located around the UK - hence our nationwide service.

Although a relatively young company, the Board and Senior Management of DataTrak can offer a wealth of experience in facilities management, software design & development, IT management and providing service to customers.

We offer not only a range of quality services and products but also a very competitive pricing structure. Our Company policy though is simple - a total commitment to quality customer service at all levels.

Safety is a core value of our company. All DataTrak people, from leadership down to everyone in the field, personally challenge the notion that injuries will occur and hold the conviction that every accident is preventable. That's why our safety performance is second to none.

Our Customer base straddles the whole spectrum of commerce and industry - both private and public. For a number of years DataTrak has been recognised as a leader in our field. We are proud of our past but are looking to the future.
