

## DSE Assessments for Homeworkers

Have you got staff working from home? Do they work with display screen equipment? Do they comply with the Health & Safety (Display Screen Equipment) Regulations 1992, as amended by the Health & Safety (Miscellaneous Amendments) Regulations 2002? The DSE Regulations came into force in 1993 to implement a European Directive, No 90/270/EEC of 29 May 1990, on minimum safety and health requirements for work with DSE.

This assessment covers the DSE Regulations only. Employers should ensure that they also comply with general duties placed on them by other health & safety legislation (see the Section on Workstation Risk Assessments).

We produce a 6 page report covering your Company-owned items such as:-

- Display Screen
- Keyboard
- Mouse (or Trackball)
- Laptop
- Software
- Furniture
- Environment

Other questions asked relate to:-

- Any problems the User has working with their DSE
- Any discomfort or other symptoms which they attribute to working with their DSE
- Awareness of their entitlement to eye and eyesight testing
- Whether or not they take regular breaks away from their DSE

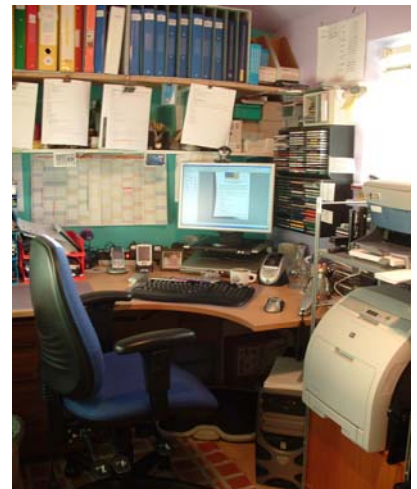

The assessment takes approximately 75 minutes on site plus a further 75 minutes off site to produce the final report. The Report is sent to you electronically in pdf format.

### The Cost

The cost is £175 per assessment but includes all travel and accommodation within England (mainland), Scotland (mainland) and Wales. Northern Ireland, the Scottish Isles, Isle of Wight, Isle of Man and any other location outside of the UK would attract an additional cost to cover air fares, hotel costs and any unavoidable surcharges.

Portable appliance testing on any Company-owned electrical equipment used by the home-based staff at their home is included in the price provided the testing is carried out at the same time as the risk assessment.

The schedule of visits is arranged in the most cost-effective and efficient way so that whenever possible at least 2 home workers per day will be assessed. Because of the geographical spread of home workers it is not always possible to do that of course, but that is what we aim to achieve. To avoid fruitless visits, all appointments are pre-arranged with the individual home worker(s).

\*Northern Ireland and any other location outside of the UK would attract an additional cost to cover air fares, hotel costs per night and any unavoidable surcharges .

(prices exclude VAT)
